SKILLS

- React Native
- Flutter
- Node.JS
- Python Django
- MySQL, PostgreSQL
- PHP (Laravel, CodeIgnitor)
- React.JS
- AI, ML and Deep Learning

CERTIFICATIONS

- Machine Learning A-Z (Udemy – SuperDataScience)
 - Python ML Expertise
 - Predictive Analysis
 - Using non-deep models to solve problems
 - Artificial Intelligence A-Z (Udemy – SuperDataScience)
 - AI System Development
 - Understanding of AI Theory
 - Self-Driving Cars, Game Strategies, Real-World Problem Solving
 - TensorFlow 2.x ZTM (Udemy – ZeroToMastery)
 - Computer Vision, CNNs, and NLP with TensorFlow
 - Building Various Deep Learning Models
- Image and Text Recognition, Time Series Forecasting

PROFESSIONAL SUMMARY

Experienced developer with background in React Native, NodeJS, Flutter, Php, MySQL, Postgres, django. Worked on development for over 7 years even before AI was a thing. Skilled in delivering high-quality applications that meet clients' needs and exceeds expectations. Seeking opportunities to bring value to organizations.

WORK EXPERIENCE

SENIOR FULLSTACK MOBILE AND WEB DEVELOPER

(Worked on React Native, React JS, NodeJS and many others)

TechTime

| 04/2024 – 06/2026

- Worked on several real-world apps actively hosted by the company.
- Main project was a seasonal bus tracking app used during Hajj in Mecca – Irshadni.
- Also built apps for travel services, including an Uber-like riding platform.
- Focused on performance, user experience, and code maintainability for long-term scalability.

SENIOR FULLSTACK MOBILE DEVELOPER

(Worked on Flutter, Php(Laravel), MySQL, Python - ML)

Wemangia

| 07/2023 – 02/2024

- Worked on a restaurant review application, Wemangia, for a startup.
- Made the entire app from ground up, focusing on scalability and reliability.
- Used Flutter and its sophisticated techniques to make the app seamless.
- Made a Recommendation System by using ML algorithms.

SENIOR FULLSTACK MOBILE DEVELOPER

(Worked on React Native, Flutter, NodeJS, Php, MySQL)

Technorizen Software Solutions

| 06/2021 – 07/2023

- Designed and developed 20+ hybrid apps.
- Trained & mentored interns & freshers.
- Delivered high-quality apps that meets the customer needs and their business goals.
- Developed high-quality, scalable mobile apps with robust backend.

REACT NATIVE DEVELOPER

| 05/2019 – 06/2021

FLUTTER DEVELOPER

| 06/2020 – 06/2021

Freelance

- Created apps that operates seamlessly on both Android and iOS mobile devices.
- Strategically designed and developed interfaces with a focus on simplifying overall management, providing enhanced user experience, and ease of use.
- Efficiently managed multiple cross-functional projects and delivered successful outcomes simultaneously

EDUCATION

Pursuing B.Tech

Artificial Intelligence and Data Science

📍 **CDGI, Indore** (Affiliated to RGPV Bhopal)

2021-2025

10+2 (ICSE/ISC) – 90%

PCM + Computer Science

📍 **MSB Edu. Inst., Indore**

2017-2021

LANGUAGES

- Fluent: English, Hindi, Urdu
- Intermediate: Gujarati
- Learning: Arabic, Japanese

INTERESTS

- Learning Languages
- Reading
- Community Involvement
- Chess
- Biking

DEVELOPED APPLICATIONS

- **Irshadni**

During Hajj Season in Saudi Arabia, the pilgrims need to be transported from Airport to Hotel, our Guider uses the Irshadni App and informs the bus driver where the pilgrims' hotel is. The backend was developed for traffic with 4 backend server in load balancing handling data as more than 1500 buses were live tracking with sub minute updates.

- **Mangia**

A restaurant review app where user can review restaurants, make friends, make groups of restaurant and that can be followed, locate restaurant using map, check global review on yelp, upload restaurant pictures, and much more. This also had ML-based ranking algorithm to personalize the restaurants in explore page.

- **CodeMode**

A learning platform which is used by institutes for online learning and tests, mainly learning programming (India/US).

- **Bike Doctor**

An app for mechanics in which the client can ask the mechanic directly via the application and the mechanic can also make payment via application.

- **Manere Sanus**

An app for the meditation center where the user can add himself to a course, by using points which can be credited via online payment

- **Bin Bin Recycle**

The app where user can request to collect garbage and should upload a photo and the admin will send a garbage collector to collect it and to recycle the stuff and the user will get the payment depending upon the quantity/quality of the garbage.

- **BadshahSoft**

An Android mobile application developed for Badshah Software Solution, an accounting software provider, to allow their clients to see their accounts in one touch.

- **Rab Office Management**

A mobile app for Android which is used by Rab Hardware to plan, manage, and engineer their office work, track their agents with gps including messaging, work/purchase ordering.

HACKATHONS

- **HACKWAVE Hackathon – 2nd Price Winner**

Hosted by CDGI, Indore (April-2024)

It was a 36 hours Hackathon, our team developed an Attendance Management System, where teacher captures the photos of the class and our AI would mark attendance using facial recognition. We successfully completed the AI, Backend and Web, and Mobile App. My contributions include in AI, Backend, and Mobile App development.
